317.1 → Calculation of Results¶

317.1.1 → The results are calculated by taking the difference between the finish and start times.¶

317.1.2 → The overall standing in a stage competition will be calculated by accumulating the results (actual times where tenths of seconds are truncated), bonus seconds and time penalties from each stage. The results of the qualification round will be used for sprint competitions. In a stage event competition, the actual time, bonus seconds and time penalties from each stage are accumulated.¶

317.1.23 → The ranking of athletes involved in a photo finish will be established according to the order they crossed the vertical plane of the finish line by the toe of the front foot.¶
